

Is Kuwait a natural gas exporter or importer?

Today, Kuwait relies almost exclusively on oil products and natural gas to meet its energy needs, with each fuel accounting for about a half of total primary energy consumption. But while Kuwait is a major oil exporter, it is a net importer of liquefied natural gas, due to underdevelopment of its gas reserves.

Can Kuwait free up oil & natural gas?

According to the International Energy Agency's WEO-2018, worldwide, about a quarter of all electricity generation comes from renewables. Kuwait, like other countries in the GCC, is endowed with world-class solar and wind resources and is increasingly looking to tap this potential as a way to free up oil and natural gas for other uses.

Will Kuwait increase the share of renewables in energy demand?

Kuwait has a soft target of increasing the share of renewables in total energy demand to about 15% by 2030, up from less than 1% today. The potential for increasing the share of renewables in the electricity generation mix in Kuwait is huge, given its substantial solar and wind resources. Central Statistics Office,

What is the future of Kuwait's Electricity sector?

The Ministry of Electricity and Water estimates that reserve margins could drop to 8% by 2020. Kuwait plans to increase base-load electricity generating capacity to 32 GW by 2035 (see Chapter 2). Until very recently, the Ministry of Electricity and Water was solely responsible for the development of the electricity sector.

Does Kuwait need solar power in 2035?

Despite some progress in supporting solar generation, in the Business-as-Usual Case, the share of renewables in total primary energy demand remains low in 2035, only 3%. Electricity generation capacity in Kuwait increases by over 13.2 gigawatts over the Outlook period, reaching 32 GW in 2035, a 70% increase over capacity in 2018.

What is Kuwait Energy Outlook?

The platform came in the form of Kuwait Energy Outlook, an energy policy platform supporting efficient coordination between the energy sector stakeholders that assures coordination and robust development among them to realize the country's domestic and international responsibilities operated and managed by national capacities.

Kuwait: Reconfiguring the Downstream. Kuwait is a founding member of OPEC and a major oil supplier to the global economy. The country holds the eighth-largest oil reserves in the world, amounting to an estimated total of 101.5 billion barrels, and its production of crude and non-conventional oil and natural gas liquids amounted to 2.9 million boepd in 2023.
