

What is the energy supply of Kyrgyzstan?

Kyrgyzstan had a total primary energy supply (TPES) of 168 PJ in 2019,of which 37% from oil,30% from hydropower and 26% from coal. [1]The total electricity generation was 13.9 TWh (50 PJ),of which 92% came from hydroelectricity,the only significant renewable source in the country. [1]

How has Kyrgyzstan reformed its energy sector?

Since the 2015 review,a number of energy sector reforms have taken place in Kyrgyzstan,and the country has made noticeable steps forward in developing non hydro sources of renewable energy,while setting clear targets to increase the share of variable renewable energy in the energy mix.

Who has power in Kyrgyzstan?

Executive power in Kyrgyzstan lies with the government,its subordinate ministries,state committees,administrative agencies and local administrations. In the energy sector,the government: Grants and transfers property rights,and rights for use of water,minerals and other energy resources.

What is Kyrgyzstan's energy saving potential?

Kyrgyzstan's energy saving potential is significant: it is estimated that rehabilitation and modernisation can save up to 25% of electricity and 15% of heat.

Which sector consumes the most energy in Kyrgyzstan?

Residential sector is the largest energy consuming sector in the country, followed by transport and industry. Electricity consumption per capita, although sometimes limited by power outages, increased by more than 45% from 2010 to 2018. Renewables contribute to 27% (2018) of Kyrgyzstan's energy mix.

Is Kyrgyzstan part of EU4Energy?

Kyrgyzstan is one of the focus countries of the EU4Energy programme, which is being implemented by the IEA, along with the Energy Community and the Energy Charter, and which includes Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, Ukraine and Uzbekistan.

Kyrgyzstan's Three-Year Energy Emergency. Kyrgyzstan has problems with electricity and heating in the winter, but now the situation with energy sources is so grim that power rationing might be introduced. On July 20, Kyrgyz Energy Minister Taalaybek Ibraev proposed declaring an emergency situation for the power sector for the next three years.
