

LEGO Solar Power Generation

Does Lego have a solar power plant?

The company has been steadily increasing its investments in solar capacity across its manufacturing sites globally, including facilities in Denmark, Hungary, Mexico and China. In 2023, LEGO's total maximum solar capacity across these locations reached an impressive 15.6 MWp, representing a 16% increase compared to 2022.

How much energy does Lego use?

The total output from the investments by the LEGO Group in renewables now exceeds the energy consumed at all LEGO factories, stores and offices globally. In 2016, more than 360 gigawatt hours of energy were used by the LEGO Group to produce the more than 75 billion LEGO bricks sold around the world during the year.

How many solar panels will be installed on the Lego's factory roof?

o 20,000 solar panels will be installed on the roof of the LEGO's factory in Jiaxing, China. The panels will produce almost six gigawatts of energy per year. This is equivalent to the electricity use of more than 6,000 Chinese households.

How much solar power does Lego have in 2023?

In 2023, LEGO's total maximum solar capacity across these locations reached an impressive 15.6 MWp, representing a 16% increase compared to 2022. LEGO also aims to include on-site and off-site solar facilities in its new factories in Vietnam, where operations will begin in 2025, and Virginia, USA.

How did Lego reach the 100% renewable milestone?

Reaching the 100% renewable milestone was a target inspired by the LEGO Group's partnership with the WWF Climate Savers programme. The LEGO Group works with other partners to advocate for investment in renewable energy and has joined the RE100, a global initiative of companies committed to using 100% renewable energy.

Will Lego Build a new solar park?

Billund, March 1st, 2023: After having installed Denmark's largest roof-mounted solar farm at its headquarters in Billund, Denmark in 2019, the LEGO Group today unveils that it hopes to build a new 80-100 MW solar park.

Carbon neutrality will be achieved with a massive amount of onsite solar power -- enough to power the entire campus. LEGO announced the factory earlier this year, showing off its sustainability goals, and on April 13 ...
