Are photovoltaics redefining the energy future of Luxembourg households?

We are redefining the energy future of Luxembourg households, offering the most advanced technologies and efficient solutions in the field of renewable energy. Photovoltaics represent savings, ecology, and an investment in your and your family's future.

How has teleworking impacted solar energy demand in Luxembourg?

The high number of sunshine hours in spring coupled with an increase in the photovoltaic surface area over recent years have been key factors in reaching a historical peak of solar energy in Luxembourg in March and April 2020. In addition, teleworking during the weeks of lockdown had a positive influence on electricity demand, which declined.

What is Luxembourg's Energy Policy?

As part of an energy policy geared towards a sustainable, secure and competitive energy supply, this financial aid is aimed at improving the energy performance of single-family houses or apartments. Luxembourg wants to accelerate the timelines for renewable energies in order to reach around 25% clean energy by 2030 and 100% in the long term.

Will Luxembourg transition to climate neutrality?

The transition to climate neutrality seems to be making great strides. With 306.3 hours of sunshine in April, which is well above average, the exceptional weather was one of the reasons behind the historical peak of solar energy in Luxembourg.

What are the 5 dimensions of Luxembourg's climate plan?

This plan has 5 dimensions in which Luxembourg can act: research, innovation and competitiveness. In order to achieve the objectives of the Paris Agreement, the national climate objective for Luxembourg is to reduce greenhouse gas emissions by 55% by 2030.

The Subfund invests in companies in the renewable energy sector, based on the thesis that the primary driver of the energy transition will be an accelerating worldwide switch to ever more cost-competitive solar energy. Apart from solar, other carbon-free sources of energy are also seen to help drive this transition, such as windpower, hydro and ...
