

How much energy does Macao use?

The results show that the Macao's energy consumption and its related GHG emissions were 32,700 Terajoules(Tj) and 3.70E+06 t CO<sub>2</sub>e. in 2010,increased by 31.10% and 100.34% over those of 2000,respectively.

What is energy in Macau?

Energy in Macau is related to all of the type of energy and its related infrastructure used in Macau,China. Energy-related affairs is administered under the Secretariat for Transport and Public Works of the Government of Macau . Macau import its natural gas supply from Hengqin Island in Zhuhai,Guangdong.

Can Macao increase solar energy?

The Macao government also sees an opportunity to increase solar energy. To encourage the installation of PV systems,officials passed a set of safety and installation regulations in 2015.

Does China's Energy Strategy work for Macao?

According to the National Energy Administration of China,the share of clean and renewable energy in China's electricity generation has almost doubled over the past decade,surging from 13 per cent in 2011 to 24.3 per cent in 2020. This bodes wellfor Macao. "Developing solar and wind energy has become China's core energy strategy," he says.

How has Macao changed its energy structure?

Since 2005,Macao adjusted its energy structure and began to increase the share of imported electricity; as a consequence,indirect GHG emissions,mainly embodied in imported electricity,grew steadily and quickly exceeded direct emissions in 2008 and finally reached a record high of 2.35E+06 t CO<sub>2</sub>e. in 2010.

Is natural gas a problem in Macao?

As a member of the Smart Energy Group of UM's State Key Laboratory,which focuses on optimising clean energy use and production,Zhang believes expanding the use of natural gas poses major problems,especially in the city's older districts. "Many buildings and [much of the]infrastructure in Macao are outdated.

The regulations require investors to enter into a 20-year contract for the purchase of photovoltaic energy with Macao's sole energy service provider, Companhia de Electricidade de Macau (CEM). Essentially CEM will purchase the electricity produced to ensure investors profit within a reasonable period. However, progress has been slow.
