Do you need a survey to install a solar panel?

So first, a professional surveyor will check your roof and rafters to ensure that a solar panel installation can go ahead safely. The results of the survey may affect the price quoted by your solar panel providers. With that done, the installation can begin.

What is a solar PV system?

power being generated by solar panels or be used in a home. Here are some quick definitions to help you. Solar photovoltaic (PV) systems are made up of several panels. Each panel has many cells made from layers of semi-conducting material, usually silicon.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

Can a solar panel be installed on a south-facing roof?

A solar panel will be most effective if you have a south-facing roof. This will ensure maximum sunlight reaches the panel. You will also have to make sure that your roof can support a panel, and that it has a large enough area for panel installation. Under Permitted Development Rights, you won't require formal permission to install a solar panel.
