

Malawi flatiron energy

What is Flatiron energy?

Flatiron Energy develops, builds, owns, and operates standalone utility-scale energy storage. Energy storage systems that integrate renewable energy onto the grid, replace fossil fuel plants, and increase grid reliability. We are a team of energy storage veterans with a long track record of delivering operational and profitable projects.

What is the energy transition in Malawi?

This infographic represents the energy transition (pale green arrow) in Malawi from the use of wood-based energy sources (showed by the blue panel on the left: trees and forests, wood-felling, and wood burning) to renewable energy technologies (showed by the blue panel on the right; wind turbine, solar panels, and tidal turbine).

Does electricity generation affect health facilities in Malawi?

Suhlrie et al. (2018) demonstrate how intermittent and ineffective electricity generation affects health facilities in Malawi, especially night-time care services. They call for a health-driven wave of investment in energy infrastructure.

What are distributive injustices in energy planning in Malawi?

In Malawi, distributive injustices arise in energy system planning, in construction and in rollout of energy generation and transmission. A focus on urban, grid connected, and high economic growth potential areas both entrenches and is symbolic of a planning rationale dominated by ability to pay in resource-constrained settings.

Does Malawi have a poor electricity supply?

UNDP data shows that Malawi is the only state in Southern Africa where less than half of the urban population has access to electricity. Poor rural electricity supply is widespread in the region, with South Africa the only state where most of its rural population has access to electricity

What is the average electricity access in Malawi?

Despite recent improvements to electricity access in Malawi, access to electricity remains at just 13.4% of the population (IEA 2020) lower than the Sub-Saharan African regional average of 47.9% (ibid). Figure 1 below sets out the average electricity access (%) in Malawi in the context of Southern Africa, 2010-2020.
