Is Malawi ready for a big Hydropower Project?

Several more projects are set to follow, but Malawi is now approaching solar saturation and ready to move on to larger hydropower plants like the 350MW Mpatamanga project on the Shire River. Salima was funded by JCM Power alongside the Private Infrastructure Development Group's InfraCo Africa and FMO.

How much solar power does Malawi have?

Malawi has 336MW on-grid hydropower capacity, but it is run-of-river with little storage and highly seasonal, making it difficult to use to manage any drops in solar generation. Eskom is having to learn quickly how to manage solar power on the grid.

Will JCM develop another solar project without battery?

JCM is unlikely to develop another solar project without battery or other technologies, as the market is rapidly becoming saturated. According to African Energy Live Data, Malawi has installed capacity of 537MW now Salima has started up.

Can Malawi absorb variable renewable power?

Battery storage and an interconnection with Mozambique and potentially Zambia will also increase Malawi's ability to absorb variable renewable power onto the grid. Grid capacity is another issue, with some areas becoming increasingly congested.

How does Malawi's power purchase agreement work?

The power purchase agreement (PPA) is in dollars, but will be paid in local kwacha; the IPP is responsible for converting and transferring currency. Malawi has an open auction system for currency which operates quite effectively, JCM Power chief executive Justin Woodward told African Energy.

What is the Salima solar project?

The project also engaged a professional chef from Lilongwe to train a team of local women to prepare and serve free, nutritious meals for the construction team each day from the on-site African Food Kitchen facility. The Salima Solar project ties in with Power Africa initiatives in the region which aim to connect more people to the national grid.

The Salima solar park will use 230,000 PV panels that are expected to start feeding electricity to Malawi's grid by the end of next year. It will operate under a 20-year power purchase agreement (PPA) with Electricity ...

JCM Power, together with Private Infrastructure Development Group (PIDG) company, InfraCo Africa, is pleased to announce that the 20MW Golomoti Solar PV and Battery Energy Storage project in the Dedza district of Malawi has successfully entered Commercial Operations. The project includes a 28.5MWp solar array coupled with a 5MW/10MWh lithium-ion battery, and ...

MALAWI . Malawi is a landlocked country in southeastern Africa, with a rapidly growing population and an interesting energy supply. Although over 70% of Malawi's electricity comes from hydropower, just 12% of the population had access to electricity in 2018. So, if it is to meet its goal of achieving 100% electrification by 2030, Malawi needs even more power -- and from more ...

The 20MW Golomoti Solar PV and Battery Energy Storage project in the Dedza district of Malawi, developed by Canada's JCM Power and InfraCo Africa has started commercial operations, according to an announcement by the developers announced this week.. The project is the first utility-scale grid-connected hybrid solar and battery energy storage project in sub ...
