This ultracapacitor is a manufactured electronic product that contains primarily non-hazardous materials, including metal and plastic.

Our industry-leading 48V module now includes the benefits of our new DuraBlue ® Advanced Shock and Vibration Cell Technology.. The new module has been tested to meet and exceed the industry's highest shock (IEC 60068-2-27 and 2-29) and vibration (ISO 16750-3, Tables 12 and 14) ratings for ultracapacitor modules, exceeding the most demanding testing requirements for ...

power density of the ultracapacitor is offset by its low energy density, appropriate systems design with ultracapacitors accounts for the high power/low energy density by using the ultracapacitor as an intermittent power cache rather than a continuous power source. Where one previously traded system performance against the size of a single
