

What is a Calala Bess?

Covering 7 hectares of land and containing up to 960 battery enclosures and required infrastructure, the Calala BESS will act as a large-scale power generator and connect to the NSW's electricity transmission grid. The Calala BESS will store up to 300MW of energy which can supply 4 hours of electricity to power up to 80,000 NSW homes.

How much energy does the Calala Bess store?

The Calala BESS will store up to 300MW of energy which can supply 4 hours of electricity to power up to 80,000 NSW homes. When will construction start, and how long will the BESS last? Construction of our Calala BESS will begin from 2023 to 2024, taking up to 12 months to complete.

How long does a Calala Bess last?

Construction of our Calala BESS will begin from 2023 to 2024, taking up to 12 months to complete. It can last for up to 25 years, after this period the BESS will be decommissioned, and the batteries recycled and repurposed. The information contained in this document is accurate as of December 2022.

Where is the Bess project located?

It relates to the operational phase of the proposed BESS and not the construction phase. The subject land is located to the east of Calala in the Tamworth Regional Council Area in Northwest NSW. The land has an area of 36.3 ha and has frontage to Calala Lane.

How many hectares is a Bess site?

The BESS will have a total footprint of approximately 8.9 hectares of the site which equates to 24% of the site area. It is proposed to construct BESS on the site and the site plan is shown as Map 3. It can be seen that it is to be sited in the south eastern corner of the subject land.

What is a Bess project?

The Project is proposed to comprise a BESS with an estimated capacity of 300 MW / 1200 MWh and associated infrastructure, including connection to existing transmission infrastructure. Edge Land Planning has been engaged by Mecone, on behalf of the Equis to prepare a Land Use Conflict Risk Assessment for the proposed BESS.

Rp 001 20220648 - Calala BESS - Noise and Vibration Assessment.docx 6 . 1.0 INTRODUCTION . Equis Energy (Australia) Projects (Ngumi 4) Pty Ltd as trustee for the Equis Energy (Australia) Ngumi 4 Asset Trust (the Proponent) are proposing to develop a battery energy storage system (BESS) project on land nearby to the township of Calala in ...

The 300MW / 1,200MWh four hour Calala BESS is just to the north of the substation, but the Kingswood and

the 200 MW / 400 MWh Tamworth battery are directly next to each other and across a road ...

System (BESS) at 57 Burgess Lane, Calala NSW (also known as 474 Calala Lane, Calala NSW) (the Site). The Site is legally identified as part of Lot 17/DP 629969 and occupies a total area of approximately 36 hectares (ha) (Figure 1), with the BESS expected to occupy approximately 8.9 ha of this Lot (or 89,000m²). The portion

Equis Energy launched a proposal for its Calala BESS next door in December 2022, at an estimated cost of \$400 million. "The [Tamworth substation] site was selected after a comprehensive assessment of electrical ...

Re: Proposed Calala Battery Energy Storage System (BESS) I am writing on behalf of Equis to inform you about a Battery Energy Storage System (BESS) that Equis is planning to build in ...

Calala BESS. Tamworth, New South Wales. Equis is developing a 300MW/600MWh Battery in Calala, Tamworth to help provide New South Wales with reliable energy. Learn More. ... The most advanced large scale BESS project in Victoria and will be one of the biggest batteries in the world.

La espa#241;ola Alten Energ#237;as Renovables y TimeToAct Capital, grupo inversor con sede en Francia, han anunciado la formaci#243;n de una empresa conjunta para impulsar el desarrollo de unos 750 MWp de energ#237;a solar y sistemas de almacenamiento de energ#237;a en bater#237;as (BESS) en M#233;xico, Italia y otras regiones estrat#233;gicas de Europa.

Calala BESS Current Status : Pre - Construction We are developing a 300 MW Battery Energy Storage System in Calala to provide New South Wales with clean, reliable, and affordable energy. Find out more Lower Wonga (Woolooga) BESS Current Status : Pre - Construction We are developing a 200MW Battery Energy Storage System in Lower Wonga (Woolooga ...

Project no. 37994 Document control Version Internal reviewer Date issued Draft version 01 Mitch Palmer 04/08/2023 Final version 01 Mitch Palmer 04/10/2023 Acknowledgements

Lumea was pleased to host Equis Australia at the Tamworth 330kV substation for a site visit last week discussing connection options for the Calala BESS project. ? Many thanks to Keiren ...

The Calala Battery Energy Storage System will allow for increased solar and wind energy to be integrated into the grid helping to reduce volatility and lower electricity prices. Equis is developing a 300MW battery near Tamworth to help ...

The Calala BESS will have a storage capacity of up to 300MW and a discharge capacity of up to 1,200MWh, which is enough power to supply electricity to up to 80,000 homes for four hours. The BESS will connect to

the NSW electricity grid via a transmission line running to the Tamworth substation on Burgmanns Lane.

Biosis was commissioned by Equis Australia to undertake a HAIS for the proposed BESS at Lot 17 DP 629969 (57 Burgess Lane and also known as 474 Calala Lane, Calala) -BESS footprint; underground transmission cable corridor will run from the BESS at Lot 17 DP 629969 then along: Lot 16 DP 629969, Lot 3 DP 244399, Lot

Mexico's front-of-the-meter BESS market is practically nonexistent. BESS is not defined by law but rather by the market. Storage projects are forced to register as an active power plant ("central electrica") and ...

The proposed Calala Battery Energy Storage System (BESS) is located approximately 5.8km southeast of the Tamworth CBD within the Tamworth regional municipality. The BESS has a charge/discharge capacity of up to 300MW and an energy storage capacity up to 600MWh, which is enough power to supply electricity for up to 20,000 homes for two hours. The BESS site will ...

Quartux, a la vanguardia de la innovaci3n en almacenamiento de energa, est25; liderando este movimiento con sus tecnologas de BESS (Bateras de Estado Slido). En este artculo, profundizaremos en el impacto de las BESS en el desarrollo sustentable de Mxico en 2024, respaldado por datos slidos y ejemplos concretos.

Calala BESS. Melbourne Renewable Energy Hub. Projects. Homepage. Energy Infrastructure Australia. Contact us. Ground Floor 36 Esplanade Brighton Melbourne VIC 3186. AUProjects@equis . 1800 161 249. In the spirit of reconciliation EIA acknowledges the Traditional Custodians of Country throughout Australia and their connections to land, sea ...

Quartux, a la vanguardia de la innovaci3n en almacenamiento de energa, est25; liderando este movimiento con sus tecnologas de BESS (Bateras de Estado Slido). En este artculo, ...

Equis Energy launched a proposal for its Calala BESS next door in December 2022, at an estimated cost of \$400 million. "The [Tamworth substation] site was selected after a comprehensive ...

La implementaci3n de BESS en Mxico no solo mejora la calidad de la energa, sino que tambi3n permite una mayor integraci3n de las energas renovables, como la solar y la eolica, lo que ayuda a reducir la dependencia de combustibles fsiles y avanzar hacia un futuro m25;s sostenible. ...

Aboriginal Cultural Heritage Assessment (ACHA) for the proposed Battery Energy Storage System (BESS) at Lot 17 DP 629969 (57 Burgess Lane and also known as 474 Calala Lane, Calala) -BESS footprint; underground transmission cable corridor will run from the BESS at Lot 17 DP 629969 then along: Lot 16 DP 629969, Lot 3

La Danza del Calalá, que tiene entre 400 y 500 años de antigüedad, se usaba para espantar el mal y pedir una buena cosecha.Producto del sincretismo religioso, y de manera ritual, es ...
