What is EthosEnergy?

EthosEnergy makes energy affordable, available and sustainable by supporting you through the complexity of business today and future transition.

What are the guiding principles for energy development in Micronesia?

In addition, the policy establishes the following guiding principles for energy development in the Federated States of Micronesia: (1) the spread of benefits to disadvantaged communities, (2) increased public awareness and local capacity, (3) private sector involvement, and (4) community solutions.

How does the geography of Micronesia affect electricity?

The single island of Kosrae has an electrification rate of 98%, while Chuuk, spread across seven major island groups, achieves a rate of 26%.⁵ Aside from limiting access to electricity, the geography of the Federated States of Micronesia has several other adverse effects on utility operations.

What makes EthosEnergy unique?

A unique combination of partnership and service quality, backed by a track record of tailored solutions, for the power, oil & gas, industrial and aerospace markets. EthosEnergy operates in over 100 countries to consistently improve performance across the value chain.

Does Micronesia have a state-owned utility company?

state-owned electric utility company. Because the Federated States of Micronesia is so geographically dispersed, three of the four utilities must serve a populous core island or group of islands as well as numerous remote islands; the Kosrae Utility Authority is the only utility that serves a single island.

How many utilities do the Federated States of Micronesia have?

Because the Federated States of Micronesia is so geographically dispersed, three of the four utilities must serve a populous core island or group of islands as well as numerous remote islands; the Kosrae Utility Authority is the only utility that serves a single island. Often, the large distances and small populations on the outer

There is at least one renewable energy system suitable for Micronesia that requires centralized resources to develop. Ocean Thermal Energy Conversion (OTEC) harvests power from the temperature difference in ocean waters between the sun-warmed surface and the cold depths. The larger the difference, the greater the potential energy harvest.
