

Moldova verterra energy

Why is Moldova in a state of emergency?

The energy vulnerabilities exposed by that crisis have made Moldova especially susceptible to Russian disruptions in gas supplies, particularly while winter temperatures drop. Meanwhile, Transnistria, the self-declared but unrecognized breakaway region, also declared a state of emergency this week.

Does Moldova have a new energy policy?

Moldova has committed to implement reforms embedded within the European Union's Third Energy Package, a suite of legislation adopted in 2009 aimed at creating integrated and competitive energy markets for natural gas and electricity.

How much electricity does Moldova produce?

The country produces only about 20 percent of its annual electricity consumption from natural gas-fired combined heat and electricity power plants. Moldova has one hydropower plant, the Costesti Hydropower Plant. Moldavskaya GRES (MGRES) in the separatist region of Transnistria supplies the vast majority of the remaining 80 percent of electricity.

Who owns Kuciurgan power plant in Moldova?

Russian energy giant Gazprom supplies the gas-operated Kuciurgan plant, which generates electricity that powers a significant portion of Moldova proper. The plant was privatized in 2004 by Transnistrian officials and later sold to a Russian state-owned company. Moldova doesn't recognize the privatization.

What is Verterra energy?

At Verterra Energy, we are committed to developing technologies that help the world achieve 100% sustainable energy in our lifetimes. With the world's first hybrid axis, the novel design harnesses the kinetic energy in both the speed and weight of flowing water. Modular, scalable arrays deploy on-site into rivers, canals, and oceans.

Does Moldova have a natural gas monopoly?

Moldova made progress toward unbundling Moldovagaz, the vertically integrated natural gas monopoly, to comply with Third Energy Package requirements. Romania's Transgaz completed the Ungheni-Chisinau Pipeline in 2021 and took over the operation of the entire gas transmission network in September 2023.

(photo courtesy Verterra Energy) Verterra Energy said it completed delivery of four Voltornus small hydro turbines to the U.S. Army Corps of Engineers. The company has produced five Expeditionary scale prototypes for lab and field testing to date April 2
