

Why did Namibia only auction solar PV capacity?

Technology choice: specific vs. neutral Namibia chose to only auction solar PV capacity based on the technology's relative simplicity, the country's excellent solar resources and the utility's desire to understand the technology better.

Can Namibia finance solar power projects without a sovereign guarantee?

The 4,5 MW Omburu Solar PV independent power project reached financial close in 2014 at a directly negotiated tariff of NA\$1,50/kWh (US\$11/kWh), proving that it was possible to finance and construct these projects in Namibia without a sovereign guarantee, thanks, in large part, to NamPower's financial health (Kaira, 2017).

What is the cheapest power source in Namibia?

Alten's bid was NA\$80,7/kWh (US\$6,3/kWh at the time of award), making it the cheapest power source on the Namibian grid. Alten Energías Renovables (Alten Renewable Energy) is a Spanish IPP that, at the time of bidding, had six IPPs in operation in Spain, sized between 1,98 and 9,06 MWp.

How many independent power projects does Namibia have?

Namibia moved from having no operating IPPs in 2015 to having 20 at the end of 2018 - making it the sub-Saharan African country with the fourth-most independent power projects, surpassed only by South Africa, Uganda and Kenya (Eberhard et al., 2019), and fundamentally changing the character of the Namibian power market.

Is Namibia on a new path to energy transition?

Namibia is also embarking on a major green hydrogen investment drive, and several developers are interested in establishing large generation plants to sell into the regional power pool. Cumulatively, these developments seem to be setting Namibia on a new path that will likely accelerate the country's energy transition.

5. Discussion

How much does NamPower cost in Namibia?

The awarded price is lower by more than one billion Namibian dollars than NamPower's initial estimate of NAD4,7 billion, representing a considerable benefit to the utility (Muller and Mukena, 2020). Unfortunately, this decision was again shrouded in controversy. Three unsuccessful bidders officially challenged the awarding decision.

Recently, many researchers have put a spotlight on solar-assisted liquid air energy storage (LAES) system for its cleanliness and large storage capacity. However, the energy efficiencies of such systems are relatively low, resulting in poor economic performance. In addition, very few studies are conducted on the performance of such systems with ...

Namibia liquid solar energy storage

Erongo Liquid Petroleum Gas (ELPG) has broken ground on a 6,000-metric-tonne liquefied petroleum gas (LPG) storage facility at Walvis Bay. The new terminal, located at Farm 39, once operational, will not only serve the Namibian market but will also supply landlocked neighboring countries, including Botswana, Zimbabwe, and parts of South Africa's Northern ...

At present, several mature energy storage technologies have been put into commercial application after centuries of development. Different kinds of energy storage technologies can convert electrical energy into mechanical energy, chemical energy and other different forms of energy for storage [4] nsidering the application scale, the pumped storage ...

At the typical set of operating conditions, the proposed system exhibits round-trip efficiency of 74.33 %, energy storage density of 23.51 kWh/m³ and levelized cost of storage of 0.2044 \$/kWh when integrated solar energy, representing a 30.55 % increase, a 30.55 % increase and a 17.91 % decrease compared with round-trip efficiency of 56.93 % ...

Currently, the country has 610 MW of grid-connected capacity, of which 460 MW is state-owned and 150 MW is run by private firms, mostly using solar panels. Namibia's planned new battery storage system brings it closer to reaching its green-energy goal.

NAMIBIA | Hardap PV Plant | 45.45 MW | Commissioned. In 2016, Alten Energís Renewables made the winning bid in the tender put out by NamPower, the country's state electricity provider, for the development, construction and financing of a 45.45 MW PV plant in Hardap, in the south of the country, located 230 km from the capital, Windhoek. The project has been structured as a ...

A recent breakthrough could allow us to store solar energy directly into a liquid for up to 18 years. How's it work? And could this be a viable path forward for solar energy storage? Let's see if we can come to a decision ...

Namibia's planned new battery storage system brings it closer to reaching its green-energy goal. Its Renewable Energy Policy aims to modernise the energy sector, make it more self-reliant and turn it into a net ...

Also currently under construction in Chile is Latin America's largest lithium-ion battery energy storage project so far at 112MW / 560MWh by AES Corporation. Highview Power meanwhile is targeting the global need for long-duration bulk energy storage that it believes is coming down the line and is already here in some places.

Compressed air energy storage (CAES) is one of the important means to solve the instability of power generation in renewable energy systems. To further improve the output power of the CAES system and the stability of the double-chamber liquid piston expansion module (LPEM) a new CAES coupled with liquid

piston energy storage and release (LPSR-CAES) is ...

This paper provides a brief overview of some of the state-of-play energy storage technologies, which may become important in the effective integration of various generation options into Namibia's electricity supply mix, and in this way, pave ...

Energy Capital & Power's recent conversation with Silvester Wayiti, CEO of HopSol, sheds light on the burgeoning solar photovoltaic (PV) market in Namibia, exploring the sector's growth prospects, challenges, and ...

The feasibility of building large-scale liquid air energy storage (LAES) systems in China is being assessed through a partnership between Shanghai Power Equipment Research Institute (SPERI) and Sumitomo SHI FW. ... (SPIC), one of China's national generation companies with an installed capacity of 190GW including 74GW of solar and wind ...

Diesel and petroleum are the most used liquid fuels in the country, ... (water heaters, pumps and solar home systems). Solar Revolving Fund: A Financing Strategy for Solar Energy Technologies in Namibia. ... Southern Africa Energy Program (SAEP)- December 2019. Power Africa. Example - Better Storage as a RE technology. Tsumkwe plant in ...

HOPSOL Africa is a technology leader for on- and off-grid solar power plants, fuel save controllers as well as solar diesel hybrid systems at utility scale (e.g. mining solutions). We are specialized in building and operating solar power plants in deserts and desert-like regions.

By utilizing molecular energy storage, liquid solar panels provide improved capacity and flexibility in design and enable off-grid power generation. Ongoing research and advancements in this field can potentially revolutionize how we ...

With the solar collector's heat storage tank temperature set at 573.1 K under extreme conditions, when the energy storage system needs to operate, both the temperature of the solar collector's heat storage tank and the temperature of the heat transfer oil after solar thermal assistance are low, resulting in insufficient residual heat ...

A group of researchers has created a liquid solar energy storage system that can create electricity on demand. The system can store solar energy for up to 18 years, allowing them to release it ...

The solar energy was stored by thermal oil; the exergy efficiency was 15.13 %: Derakhshan et al., 2019 [87] Integrated with solar energy: SS; TD + ECO: Linde cycle + open-Rankine cycle: Methanol/propane: Methanol/propane: Co₃O₄/CoO: Compressed air: 47.4 %: Co₃O₄/CoO for heat storage of solar energy; payback period was shortened to ~10 ...

Namibia liquid solar energy storage

DanAon Energy (Pty) Ltd., a Namibian-owned solar energy company, is progressing with plans to develop a 40MW grid-connected photovoltaic (PV) solar plant at Gibeon in the Hardap Region. The company is currently awaiting approval from the Electricity Control Board of Namibia, and the Environmental Clearance Certificate (ECC) for the project.

Due to characteristic properties of ionic liquids such as non-volatility, high thermal stability, negligible vapor pressure, and high ionic conductivity, ionic liquids-based electrolytes have been widely used as a potential candidate for renewable energy storage devices, like lithium-ion batteries and supercapacitors and they can improve the green credentials and ...

Highview Power has revealed plans for a long-duration energy storage (LDES) project using its liquid air energy storage (LAES) technology, in Scotland. The company is developing a 2.5GWh project, called Hunterston, on a site in Peel Ports in North Ayrshire, Scotland. It will be the company's second project to use its LAES technology.

Researchers at Chalmers University of Technology in Sweden have demonstrated efficient solar energy storage in a chemical liquid. The stored energy can be transported and then released as heat ...

The MOST system provides a significant advancement in solar energy storage and production. Unlike traditional solar panels, it generates electricity regardless of weather, time of day, or location, without emitting carbon dioxide.. Researchers are now focused on improving the system's efficiency and making it cost-effective for commercial use. According to Kasper Moth ...

iseli energy is solar wholesaler providing competitive, innovative and sustainable energy solutions in Southern Africa. Specialising in solar and storage technologies, iseli energy is dedicated to revolutionising the solar market by introducing cutting-edge products that address the evolving energy needs in Africa.

Liquid storage of solar energy - more effective than ever before March 20 2017 When the molecule is hit by the sun it changes shape and stores the energy for later use. Credit: Ella Marushchenko

Readily committed to ramping up its renewable energy output, Namibia is on the brink of energy transformation. InnoSun - one of the first movers in the market - is aiming to surpass the country's goal of achieving a ...

Provides yo u with Reliable Energy Options We take great pride in our unwavering dedication to quality. By partnering with renowned manufacturers and R& D teams globally, we source advanced solar, wind (onshore & offshore), biomass and nuclear power technologies to ensure that our customers receive reliable, high-performance clean energy products that withstand ...
