

Who is Sunbeam?

Sunbeam was founded in 2011 by Marco Jansen and Peter Wieriks. They both have years of experience in the areas of innovation, product management and the realisation of sustainable energy solutions such as mounting systems for pitched and flat roofs.

What is Sunbeam Luna?

Sunbeam Luna is our mounting system for pitched roofs. The smart, stable construction allows for a rapid mounting process and optimally and safely supports the solar panels. This way, the solar panels can generate sustainable energy for years, without any issues.

Does Sunbeam have a ballasted roof system?

Until now, the Supra system has been installed ballasted. However, with the addition of fully anchored systems, Sunbeam now offers an innovative solution for roofs that can support less weight. This is a crucial development, as ballasted systems are sometimes not a viable option for certain roof structures.

Does Sunbeam offer a lighter mounting system?

This upgrade meets growing market demand for lighter mounting systems due to the limitations of roof structures. Until now, the Supra system has been installed ballasted. However, with the addition of fully anchored systems, Sunbeam now offers an innovative solution for roofs that can support less weight.

How many Sunbeam supra panels are there?

In June 2023, Zonnegilde started installing the first Sunbeam Supra mounting systems in the Netherlands at the largest pepper grower in Europe. A total of more than 2,400 panels are placed symmetrically, spread over three roofs. In addition, almost 14,000 panels are placed diagonally on Sunbeam Luna substructures.

How many solar panels are placed diagonally on Sunbeam Luna substructures?

In addition, almost 14,000 panels are placed diagonally on Sunbeam Luna substructures. The solar roof of Scania Production in Zwolle, featuring roughly 22,000 solar panels, has a capacity of 6 MWp. This project was realised by Zonneplan using a Sunbeam Symmetrical substructure.
