

What time is the New Zealand solstice?

This results in the least sunlight, making it the shortest day and longest night of the year. The exact date will change each year by a few days. For the more detail-orientated, the solstice will occur at 8.51am on Friday according to the Royal Astronomical Society of New Zealand. Advertisement Advertise with NZME.

When is the 2024 Winter Solstice in New Zealand?

In New Zealand, the 2024 winter solstice happens on June 21, while the Northern Hemisphere experiences the summer solstice. The winter solstice is an astronomical event that marks the day when the Southern Hemisphere is tilted farthest from the sun. This results in the least sunlight, making it the shortest day and longest night of the year.

What is winter solstice?

The winter solstice is an astronomical event that marks the day when the Southern Hemisphere is tilted farthest from the sun. This results in the least sunlight, making it the shortest day and longest night of the year. The exact date will change each year by a few days.

What is a summer solstice?

The Summer Solstice is also known as the longest day, which is perhaps the most notable feature. This is the first day of Astronomical Summer and occurs as the sun reaches its most northerly or southerly path in the sky. The Autumn or Fall Equinox signals the end of Summer on the astronomical calendar.

What is New Zealand's energy supply like in 2022?

Mike Hayward said. Energy supply from renewables reached 44% in 2022, building off last year's record high of 40.8%. This is the highest since reporting started in 1990. The closure of Marsden Point Oil Refinery in 2022 also saw New Zealand increase imports of refined oil products like petrol, diesel, and aviation fuel.

What happened to solar energy in New Zealand in 2023?

Solar generation increased by 30.3 per cent (85 GWh) to 367 GWh, mostly due to further installations of distributed solar panels (such as on households). Additionally, November 2023 saw the commissioning of the Kohir? solar farm in Kaitia, the first utility-scale solar farm in New Zealand.
