station that will be built on the Zambezi River in the Western Province of Zambia. The project will produce seasonally variable

Specifically created to implement the Ngonye Falls project, the company is in the final stages of development having completed all technical environmental and permitting obligations for the 180MW Ngonye Falls run-of ...

Electricity supply will be boosted by 60 megawatts thanks to an Implementation Agreement for the Ngonye Falls Hydro Electric Scheme signed between Western Power Company Ltd and the Ministry of Energy and Water Development today.

The Ngonye Falls Power Station, is a planned hydroelectric power station across the Zambezi River in Zambia. The power station will have maximum generating capacity of 180 megawatts (240,000 hp) when completely developed. The energy will be sold to ZESCO under a long-term power purchase agreement. [1] It is named after the nearby Ngonye Falls.

The 3km long concrete lined power canal is 11m deep, with a maximum water depth of 9m and capacity to convey 1100m<sup>3</sup>/s. At the end of the canal, a forebay is formed from the natural landscape and retaining dams. The forebay holds a buffer of water for the power station to maintain constant flow through the turbines.

Enel Green Power ("EGP"), the Enel Group's global business line dedicated to renewable energy, has started operations of the 34 MW1 Ngonye solar PV plant, which is the Group's first power plant in Zambia. The Ngonye solar plant, which is owned by a special purpose vehicle 80% held by EGP and 20% by IDC, is supported by a 25-year power ...
