

Norfolk Island solar ki price

Does Norfolk Island have too much solar energy?

That's pretty impressive given its remoteness and a population of 1,849. But this uptake has also caused some headaches in managing Norfolk Island's electricity network, with too much solar energy goodness generated at times. The Tesla battery system installed in December 2020 has helped out on that front.

How many solar panels are there in Norfolk Island?

44 km of high and 44 km of low voltage cabling. Distributed household rooftop PV systems. There have been more than 555 small-scale solar power systems installed on Norfolk Island, with a collective capacity of 1,770 kW. That's pretty impressive given its remoteness and a population of 1,849.

How much energy does Norfolk Island generate a year?

Based on a conservative average of 7,139 kWh of energy production a day (enough to power the equivalent of 446 homes) and retail electricity costs of 0c per kilowatt-hour; Norfolk Island and 2899 postcode area residents are collectively generating \$0 of energy at retail prices a year!

How much solar irradiation does Norfolk Island experience?

Norfolk Island experiences solar irradiation levels reaching approximately 4.81 kilowatt-hours per square metre per day on average over a year. The following graph shows solar irradiation/output levels per kilowatt of installed solar panels in the 2899 area per month.

How many watts are there in Norfolk Island?

In Norfolk Island's postcode area (2899), more than 555 small-scale systems have been installed with a collective capacity of 1,770 kW as at February 28, 2023. Given a population of 1,849, this works out to 957 watts per person in the area, compared to a 827 watts Australian average.

Will Norfolk be 100% renewable by 2024?

Norfolk Regional Council has set its sights on 100% renewables by 2024, introducing feed-in tariffs and reducing the highest consumption tariff of \$0.72 per kilowatt-hour by at least half by that year. Michael caught the solar power bug after purchasing components to cobble together a small off-grid PV system in 2008.

The latest quarterly annual and quarterly rates of price inflation - known as the Retail Price Index (RPI) - are available on this page. The RPI is based on the tracking of retail prices across a weighted basket of goods and services for an average household. Norfolk Island began tracking its inflation using the RPI in 1990.

Incite Energy's electrical engineer, Matias Valdes and Director of Decarbonisation, Kody Ponds are working alongside Norfolk Island Regional Council to carry out commercial survey and design studies on Norfolk Island for the rollout of BESY Energy commercial solar for NIRC utilities, which will benefit the whole community. If you would like to know more about BESY Energy and it's ...
