

Oil storage solutions Egypt

Can Egypt become a regional oil and gas trading hub?

Egypt boasts a robust energy infrastructure that is poised to propel it to the forefront as a regional oil and gas trading hub. The country's strategic location, coupled with its vast energy resources, makes it an ideal candidate to assume this pivotal role. Sarah has been writing in the oil and gas field for 8 years.

Does Egypt have oil & natural gas infrastructure?

Egypt's Oil & Natural Gas Infrastructure Egypt is operating the Suez Canal, a 193km artificial waterway that connects the Red Sea to the Mediterranean Sea, and the Suez-Mediterranean Pipeline (SUMED), a 42-inch pipeline that transports crude oil between the Gulf of Suez and the Mediterranean Sea.

Why is Egypt a good candidate for oil & gas?

The country's strategic location and substantial resources position it as a promising candidate for this role. This well-developed infrastructure facilitates the export and import of oil and gas, enabling Egypt to participate actively in hydrocarbon trade while serving as a crucial energy transit nation. Egypt's Oil & Natural Gas Infrastructure

Does Egypt have a strong infrastructure?

Meanwhile, Minister of Petroleum and Mineral Resources, Tarek El Molla, stated in June 2022 that Egypt has a strong infrastructure that can be linked to the gas fields producing in the region, in addition to good relations with partners in the Eastern Mediterranean region.
