How much does a solar PV inverter cost?

Their modular systems, for instance, not only offer a space-saving benefit, but they also ensure that one malfunctioning panel does not affect the productivity of an entire string of solar panels. The average solar PV inverter replacement cost of a micro inverter typically ranges from £20 per unit to £100 per unit.

Do you need to replace a solar PV inverter?

One of the most critical components of a solar PV system is the inverter. If your solar PV inverter is no longer working efficiently, you may need to replace it. In this article, we'll take a closer look at the cost of replacing a solar PV inverter in the UK and the best manufacturers.

How much does a solar inverter cost in 2023?

In 2023 a basic central solar inverter costs around £500 to £1,000 and has a life expectancy of around 10 to 15 years. Other types of inverter such as microinverters and power optimisers are more expensive, but they have a much longer life expectancy - and they can make your entire solar PV system more efficient.

How long do solar inverters last?

That being said, because micro inverters deal with much lower input voltage quantities than their cheaper counterparts, they do last considerably longer: sometimes up to 25 years. If cost is your biggest concern, many users do purchase long-term solar warranties to cover their solar PV inverter replacement costs.

How much does a string inverter cost?

Most string inverters come with a 5- to 10-year warranty that can be extended for a premium. Considering most solar panels come with a 25-year warranty, it goes without saying that you will at some point have to replace your inverters. The average solar PV inverter replacement cost of a string inverter typically ranges from £500 to £1500.
