

Is solar energy a reliable source of energy in Palestine?

In Palestine, solar energy is a reliable source of energy due to its high average radiation and sunshine rate per day (Daoud, 2018), Yet, the yearly progress of the solar energy is around 1% only as indicated by the Palestinian Energy Authority (PEA) plan (PEA, 2013). How to solve the current energy issues in Palestine?

To solve the current energy issues in Palestine, the following recommendations are proposed to reduce the dependency on imported energy generated from non-renewable sources.

Who supplies Palestinian electricity?

The Israel Electric Corporation (IEC) supplies most of the electricity in the Palestinian territories. PETL is the sole buyer of imported electricity for distribution in West Bank Areas A and B and in the Gaza Strip, which in turn supplies the electricity to the six Palestinian distribution companies.

Can rooftop photovoltaic help the Palestinian Grid?

Rooftop photovoltaic can play a role for the Palestinian grid and recently, several PV systems have been implemented in the West Bank by government or private companies as shown in Table 4, it is recommended to share the successful experience to encourage more industries and institutions to develop their own sustainable energy supply system.

What is the future consumption of electricity in Palestine?

Future consumption of electricity is expected to reach 8,400 GWh by 2020 on the expectation that consumption will increase by 6% annually. The Palestinian Electricity Transmission Company (PETL), formed in 2013, is currently the sole buyer of electricity in the areas under Palestinian Authority (PA) control.

Can a wind turbine be used on a rooftop in Palestinian cities?

Due to the high population in Palestinian cities and its full of high-rise residential buildings which is considered an advantage to the wind turbine when it is utilized on the rooftop, a higher power generation can be generated by a wind turbine which can be completely manufactured locally (Juaidi et al., 2016).
