

Panama solar power for factories

Why is a US company building a solar panel factory in Panama?

July 26 (Reuters) - A small U.S. solar company with no manufacturing experience on Tuesday announced plans to open a solar panel factory in Panama to help the American industry reduce its reliance on Chinese-made goods.

Will universal solar America open a solar panel factory in Panama?

Universal Solar America will open a solar panel factory in Panama to supply the U.S. market.

When will universal solar install a solar plant in Panama?

The U.S. has had a free trade agreement with Panama since 2012. Equipment for the plant should be installed by early October and up to 50 employees will be hired. Universal Solar expects first delivery of modules in the fourth quarter of 2022.

Where is universal solar based?

Arizona-based solar module provider Universal Solar announced it will build a 600 MW PV panel manufacturing facility at the Colón Logistics Park located in the Colón Container Terminal CCT in Colón, Panama. "Universal Solar is taking orders now, with delivery expected in the fourth quarter 2022," the company said in a statement released.

How many solar panels can universal solar produce?

Universal Solar can build two more similarly sized buildings at the terminal that could eventually support 5 GW of annual solar panel production. The lines will have the immediate ability to produce 350- to 545-W panels. Therefore, Universal Solar is going after all market customers -- residential, commercial and utility-scale.

Where are solar panels made?

Though solar panels are assembled in several Asian countries, the industry's raw material, polysilicon, is primarily produced in China and has been tied to concerns about forced labor in the Xinjiang region.
