The most commonly used power supply scheme in traditional data centers is AC UPS, and the wide-scale application of AC UPS brings serious harmonic pollution to the power grid. As a new type of power supply technology, Panama power supply was born, which is a very important breakthrough for data center power supply technology.

October 31, 2004 - Page 1 of 7 2 Power Quality What is poor PQ? A perfect power supply would be one that is always available, always within voltage and frequency tolerances and has a pure noise-free sinusoidal wave shape [1]. This should be placed in the context of sensitivity of loads to various kinds of disturbances.
