

Photovoltaic bracket aluminum frame supplier

Why should you choose a solar PV mounting supplier?

As a solar PV mounting supplier, we provide you with high-quality solar panel ground mounting systems, including solid brackets and support structures so that you can install solar panels on the ground for reliable solar power generation.

Does aluminum alloy need aging heat treatment for solar photovoltaic brackets?

The commonly used aluminum alloy series for solar photovoltaic brackets need to undergo aging heat treatment to achieve the required strength. China Aluminum strictly controls the solution treatment and aging heat treatment process to ensure the required strength of the aluminum alloy brackets.

Is aluminum a good material for solar panels?

With its advantages of light weight, high strength, corrosion resistance and durability, aluminum is widely used in building solar panel frames and photovoltaic supports. Research shows that aluminum is the most widely used material in solar photovoltaic (PV) applications, accounting for more than 85% of most solar PV modules.

What types of solar panels does Chalco stock?

Chalco stock various aluminum extruded solar panel frames and photovoltaic support aluminum alloys, with a variety of finishes to choose from. If the existing products are not suitable for your needs, we can also customize them according to customer requirements.

What is the best material for solar panel support?

Aluminum alloy, with its moderate price, strength, processability, corrosion and weather resistance, and recyclability, is an ideal material for solar panel support in solar mounting system, requiring no maintenance over the 25-year operation period. Quick Quote T-profile: capability to offer both support and stability.

Who is solar racking company?

We are a professional solar racking design, manufacturing, and supply company based in Xiamen, China. We provide high-quality and reliable solar racking products. Our products include solar roof racking, ground racking, rooftop racking, automatic tracking systems, and many other types suitable for different types and sizes of solar power projects.

Aluminum's photovoltaic panel racking system for ground projects consists of 3 parts: base, structure and clamps. 1. The base is the support for mounting system. It must hold the solar panels and ...
