

# Photovoltaic panels installed on the roof will leak

What causes roof leaks after solar panel installation?

Improper installation is one of the primary causes of roof leaks after installing solar panels. If the solar panels are not securely attached or if the mounting brackets are not correctly positioned, water can seep into the gaps and result in leaks.

Can you fix a roof leak under solar panels?

When faced with a roof leak under your solar panels, it's important to take immediate action to prevent further damage to your roof and home. Fixing a roof leak under solar panels requires careful attention to safety precautions and following the proper steps to resolve the issue.

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

Why do solar panels leak?

Older roofs or roofs with existing damage may be more susceptible to leaks under the added weight and penetration of solar panels. Flashing issues: Flashing is used to create a watertight seal around roof penetrations such as vents, chimneys, or skylights. If the flashing is damaged or improperly installed, it can cause water to seep in.

What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.

What should I do if my solar panel is leaking?

Regularly clean the panels and surrounding roof areas to prevent buildup of dust, leaves, and other debris that can cause damage. Inspect and reinforce roof flashings and seals to prevent leaks and water damage, especially in areas surrounding the solar panel mounts.
