

What is the energy mix in Benin?

Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass. Benin is also dependent on energy imports from Ghana and Côte d'Ivoire.

What is Benin's current energy situation?

This section provides information on Benin's current energy situation with energy demand-and-supply scenarios. According to the International Renewable Energy Agency (IRENA), 41% of Benin's population currently have access to electricity.

Does Benin have energy resources?

While Benin has many energy resources, it lacks the infrastructure both to convert these resources into electricity and to transport the electricity throughout the country. Energy resources in Benin and most Western African countries are not evenly distributed.

Why is Benin reliant on electricity imports?

Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes, including plans for electrification, have been put in place in the country, where only 30% of the population had access to electricity in 2017.

Which institutions are working to provide access to affordable energy in Benin?

Several institutional frameworks in the energy sector in Benin are working to provide access to affordable energy in the country. The ME is the biggest institution of the energy sector, responsible for the management of the energy sector and in charge of the implementation of RE projects.

Are there empirical studies on Benin's energy situation?

However, no empirical studies were found in literature on studies of the Republic of Benin's energy situation, and so more research and studies focusing on Benin are needed. Table 1. Summary of literature on the subject. 3. Benin's energy situation 3.1. Energy consumption

Students learning about solar energy installation. Enock Missi Hounhoui, president of the Benin Energy Association, said Benin has shown a commitment to relying on renewable energy as a lever for job creation. He added that the manufacturing of equipment such as solar panels, wind turbines, and biodigesters, as well as the associated engineering and services, are areas that attract young people ...

The pumped hydro energy storage system (PHS) is based on pumping water from one reservoir to another at a higher elevation, often during off-peak and other low electricity demand periods. When electricity is needed, water is released from the upper reservoir through a hydroelectric turbine and collected in the lower reservoir [9]. The storage ...

Total S.A., the Republic of Benin, and the Soci&#233;t&#233; B&#233;ninoise d'Energie Electrique (SBEE) signed a Gas Supply Agreement and the Host Government Agreement for the development of a Liquefied Natural Gas (LNG) import floating terminal and the supply of up to 0.5 million tonnes per annum (Mtpa) of regasified LNG from Total's global portfolio ...

Benin is one of the least-developed countries in West Africa, struggling to satisfy the energy needs of its 12.2 million inhabitants []. With a total surface area of 114 763 km<sup>2</sup>, the country is endowed with a high potential for energy resources []. However, almost 59% of Benin's population currently lacks access to electricity [] and the country is heavily dependent on ...

Benin is a coastal country located in the Gulf of Guinea in Western Africa, which is a resource rich region. Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass. Benin is also dependent on energy imports from Ghana and Côte d'Ivoire. While power plants and other energy facilities were built in the 1950s and 1960s, the la...
