

Discovery of Pitcairn Island . Captain Philip Carteret first spotted Pitcairn Island in 1767 but couldn't land due to rough seas. He miscalculated its location, marking it miles away from its true position. Years later, Captain Cook showed some interest, but it wasn't until the Bounty mutineers arrived in 1790 that the island gained attention.

IX Renewables | 2,883 ? LinkedIn ????Global Renewable Energy Partner | IX Renewables specializes in EPCI management and consultancy for renewable energy projects. Renewable Power for Remote Communities. The preceding maps of Solar radiation (Solargis) and Wind energy (Global Wind Atlas) show that Oceania is able to be roughly split into regions close to the Equator and those farther away with different amounts of Solar radiation and ranges of Mean Wind Speeds.Solar Power appears to be the most significant source of Renewable ...

At IX Renewables, we take pride in our line of work and are thankful to the partners we are blessed to work with. The renewable energy sector gives us a chance to make a change for future generations. ? Today, on Global Wind Day, we're celebrating the incredible power of wind energy and the progress we're making together.

The mutineers turning Bligh and some of the officers and crew adrift from HMS Bounty on 29 April 1789. Adamstown, the only settlement on the Islands. In 1790, nine of the mutineers from the British naval vessel HMS Bounty, along with the native Tahitian men and women who were with them (six men, 11 women, and a baby girl), settled on Pitcairn Island and set fire to the Bounty.

The global biological value of the marine ecosystems of the Pitcairn Islands is outstanding, and deserves strict protection and recognition. A large no-take reserve, while allowing for traditional small-scale uses, conserves this unique environment, attracts scientific and conservation interest in studying and protecting the area, and also increases tourism to the islands, all of which ...
