How much money does Puerto Rico have to pay for solar?

Up to \$190 million is available to Puerto Rico's Housing Administration and a private company to pay for solar and battery installations in public housing common areas and subsidized, multifamily housing properties. Another \$175 million is available for certain healthcare and dialysis centers.

Does Puerto Rico have a solar program?

To further assist Puerto Rico's energy resilience and clean energy goals, DOE today announced that on February 22, 2024, residents can apply for DOE's Programa Acceso Solar (Solar Access Program) -- a program designed to connect up to 30,000 low-income households with residential rooftop solar and battery storage systems with zero upfront costs.

How much solar power does Puerto Rico need?

On Monday, U.S. Energy Secretary Jennifer M. Granholm (pictured in April) says this newly announced U.S. investment will add up to 200 megawatts of solar generation, and a further 285 megawatts of reliable storage capacity for Puerto Rico's electric grid to improve its resilience. Will Puerto Rico get a \$860m private-loan guarantee for solar & battery storage?

Oct. 21 (UPI) -- The federal government announced Monday a more-than-\$860M private-loan guarantee for construction of solar and battery storage facilities for Puerto Rico.

Will Puerto Rico become 100% renewable?

Puerto Rico's Act 17 requires that Puerto Rico's public utility end by 2028 all coal-fired energy generation in order to shift the island to a 100% renewable energy mix in the next few decades by 2050.

What is the Puerto Rico energy Resilience Fund?

This program is a consumer-facing application phase of the first round of funding from the Puerto Rico Energy Resilience Fund, a \$1 billion DOE program focused on improving the resilience of Puerto Rico's electric grid with an emphasis on the region's most vulnerable and disadvantaged households and communities.

The island is required by the 2019 Puerto Rico Energy Policy Act to reach 40% of its renewable-sources energy goal by 2025 -- a seemingly impossible goal. For example, the island's government recently launched a campaign to provide low-income households with solar panels, but the initiative has made little progress.
