

Puerto Rico optimum solar power

What is solar power in Puerto Rico?

Solar power is a renewable energy source that has been booming in Puerto Rico since the hurricane. Across the island, individuals, communities, and businesses are installing solar panels and battery systems. At the Community Foundation of Puerto Rico, Javier Rivera is working on solar systems with 50 mostly rural, underserved communities.

Can rooftop solar power be used in Puerto Rico?

According to a 2020 study by the U.S. Department of Energy (DOE) and the National Renewable Energy Laboratory (NREL), rooftop solar power can offset or reduce the overall energy needed for transmission and distribution in Puerto Rico.

How much money does Puerto Rico have to pay for solar?

Up to \$190 million is available to Puerto Rico's Housing Administration and a private company to pay for solar and battery installations in public housing common areas and subsidized, multifamily housing properties. Another \$175 million is available for certain healthcare and dialysis centers.

Is Puerto Rico prepared for solar energy growth?

In 2017, Puerto Rico had an installed solar capacity of 127 Megawatts at the utility-scale and 88 Megawatts at the small-scale. In February 2021, Puerto Rico's electric power authority requested proposals to generate 1 Gigawatt of renewable energy capacity, revealing that the Puerto Rican solar market is poised for further growth.

Who is installing solar panels in Puerto Rico?

Individuals and communities, including the Community Foundation of Puerto Rico, are installing solar panels and battery systems across the island. Javier Rivera is working on solar systems with 250 mostly rural, underserved communities.

Does Puerto Rico need energy storage solutions?

"Isolated from typical supply lines, Puerto Rico needs solutions that reduce electricity costs, improve grid reliability, and accelerate renewable energy deployment," says DEPCOM Director of Energy Storage Nadja Gocek.
