

# Qatar talus renewables

Who is talus renewables?

US green ammonia systems supplier Talus Renewables has raised USD 22 million (EUR 20.6m) in a Series A funding round co-led by Material Impact and Temasek's Xora Innovation. Cavallo Ventures, the venture capital (VC) arm of Wilbur-Ellis, and Rice Investment Group also took part in the transaction, according to a press statement on Thursday.

What makes Xora innovation different from talus renewables?

Phil Inagaki, Managing Director of Xora Innovation said: "Xora Innovation specializes in supporting ventures tackling some of the world's greatest challenges through the commercialization of disruptive technologies and Talus Renewables embodies this investment thesis. One of the distinguishing features of Talus is their speed of execution.

How can talus reduce supply chain length?

Talus's systems' ability to generate lower-cost, carbon-free ammonia at or near the point of use reduces or eliminates supply chain length for agriculture, mining, and industrials, with additional applications in maritime shipping, renewable energy storage, and power generation.

Can talus create green ammonia in situ?

"Through the long-term vision that Talus has for a prosperous global economy backed by renewables, their first vertical application of creating green ammonia in situ will make a great impact in increasing the food supply chain sustainably and cost effectively.

How does talus work?

Talus locally produces lower-cost, carbon-free ammonia at or near the point of use, creating value for multiple industries. The talusOne and talusTen operate on intermittent renewable power and are fully containerized and modular, enabling rapid deployments and scaling.

When will talus start delivering a talusone system?

Talus expects to start delivering multiple units of its talusOne and talusTen systems later this year in the US and European markets. The first talusOne unit has already been installed in the Kenya Highlands. (USD 1.0 = EUR 0.939)

Talus Renewables ("Talus"), a renewable energy infrastructure company and creator of the first modular green ammonia system deployed commercially, announced its \$22 million Series A ...
