

Renewable energy consulting firms Antarctica

Transporting fuel and oil to Antarctica is a costly and sometimes risky exercise. Before the introduction of renewable energy systems, Australian stations required 2.1 megalitres of diesel fuel every year for power and heating. Burning this fuel emitted around 5,500 tonnes of carbon dioxide into the Antarctic environment.

CONSULTING FIRMS AS CATALYSTS FOR ACCELERATING RENEWABLE ENERGY ADOPTION
Consulting firms bring a wealth of expertise and resources to the table, making them invaluable catalysts for change in accelerating the adoption of renewable energy solutions (Zhang, 1998). Consulting firms' expertise in the renewable energy sector includes technology ...

We work with organizations across the energy sector--utilities, developers, investors, tech companies, government bodies, and regulators--as they shape strategy ...

Technically mature and commercially competitive, renewable energy is the driving force behind the decarbonised energy system of the future. The installation of renewable energy capacity - be it onshore and offshore wind, solar or hydroelectric power - is rapidly accelerating and pushing aside hydrocarbon-based energy.

The scale and ambition of renewable energy generation is advancing at a rapid pace. Whether you're developing onshore or offshore wind, ground based or floating solar, or a hub that combines renewable sources with storage, technology is expanding the realms of the possible. However, as governments across the world push for decarbonisation, supply chains are being ...
