

Return energy Pitcairn Islands

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

What happened to Pitcairn Island?

Dawn in the south Pacific was blinding, the low sun reflected across a glittering ocean. Pitcairn Island lay dead ahead, but only when the sun rose into a more benign position could we discern its ragged profile.

How do I get to Pitcairn?

Getting there: with no airstrip, the easiest way to visit Pitcairn is on the Aranui (aranui.com) or a handful of other cruise ships that make occasional visits, or via the island's supply ship, the Silver Supporter.

Why is Pitcairn a unique place?

Shortly after they made it ashore, the Bounty was set alight by one of the mutineers, turning Pitcairn into a prison island for the settlers. For better and worse, today it is a singular place, not just unique, but actively unlike anywhere else on Earth.

How much does a 'Pitcairn and Gambier' cruise cost?

An 11-day 'Pitcairn and Gambier -- In the footsteps of the Bounty Mutineers Cruise' on board Aranui 5, next departing on February 17 2024 from Papeete, costs from EUR5,935 including all meals and scheduled excursions.
