Can rooftop solar panels meet our energy needs?

We have published research by the UCL Energy Institute into the true potential for meeting our energy needs if we made full use of the rooftop space available for solar panels across the country.

Is rooftop solar a good investment?

Chris Hewett, chief executive of Solar Energy UK and co-chair of the Taskforce, said: Installing rooftop solar power, whether at residential or commercial scale, is one of the best investments available, offering dramatic savings on energy bills and the opportunity to be paid for sending excess power to the grid.

Will a 'rooftop Revolution' see more UK homes fitted with solar panels?

Sign up here. Climate and energy news. In a frontpage story, the Observer reports that Keir Starmer's Labour government has unveiled plans for a "rooftop revolution" that will see millions more UK homes fitted with solar panels.

Will Ed Miliband launch a 'solar rooftop Revolution'?

Ed Miliband has said he wants to launch a "solar rooftop revolution" as he takes steps to boost the UK's solar energy capacity. The new Energy Secretary has relaunched the Solar Taskforce with the aim of tripling the amount of energy the panels generate in the UK.

Why is rooftop solar so popular in the UK?

Solar Energy UK Chief Executive Chris Hewett said: "The reasons behind the extraordinary place of rooftop solar deployment are simple. Power from the grid remains expensive, whereas solar is cheap, paying back in a handful of years in most circumstances. "It's one of the best investments that home and small business owners can make.

What if the government fails to kickstart a rooftop solar revolution?

If the government fails to kickstart a rooftop solar revolution, an area of countryside larger than the size of Greater London will be required for ground-mounted schemes. CPRE's view is that this land could be much better used for either nature recovery, public amenity or low impact food production; or a mixture of these.

Electricians from Coqu&#237; Solar install two racks of solar panels onto a rooftop in Salinas, Puerto Rico. Each panel produces 315 watts of power that can be stored in solar ...

A major new CPRE report has found that over half the solar panels needed to hit national net zero targets could be fitted on rooftops and in car parks. The research, by the UCL Energy Institute, for CPRE, shows that ...
