

How is Saudi Arabia developing its solar energy sector?

1. Saudi Arabia has initiated the National Renewable Energy Program (NREP) to develop its solar energy sector, with several projects in progress, including a 600 MW capacity project. 2. Large-scale project such as Sakaka solar Independent Power Producer (IPP) (300 MW) and Dumat Al Jandal wind project (400 MW) were part of the first bidding process.

How much power does Saudi Arabia need?

Saudi Arabia has established a goal to source at least 50 percent of its power from renewable energy by 2030, expanding its capacity to 130 gigawatts (GW), 58.7 GW of which is expected to come from solar and 40 GW from wind. This target is the most ambitious of its kind among Gulf Cooperation Council (GCC) countries (Figure 1).

Will Saudi Arabia invest \$270 billion in low-carbon energy projects?

Saudi Arabia has declared its intention to invest \$270 billion in low-carbon energy projects by the year 2030. Table 3 shows major investment projects in Saudi Arabia for energy transition. Table 3. Overview of major investments in Saudi Arabia's energy transition and RE initiatives RE = renewable energy; SAR = Saudi Riyals.

Why is Saudi Arabia embracing solar and wind power?

Despite having almost limitless reserves of oil, the kingdom is embracing solar and wind power, partly in an effort to retain a leading position in the energy industry, which is vitally important to the country but fast changing.

Why is Saudi Arabia transitioning to independent power and water projects?

Saudi Arabia is transitioning towards independent power and water projects to address the escalating power requirements and broaden the array of energy sources via the National Renewable Energy Program. This will be accompanied by a substantial rise in non-oil government income and the private sector's contribution to GDP. 1.

Does Saudi Arabia have nuclear power plants?

At present, Saudi Arabia has no nuclear power plants, but has plans to include atomic energy in its future energy mix and build domestic nuclear industry in anticipation of meeting rapid increase in energy demand across the industrial and residential sectors.

Saudi Arabia: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...
