How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale projects in Latin America with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:

What kind of energy does Chile use?

Chile has the potential to run exclusively on renewable generation, with an estimated energy mix of 46% solar, 31% wind, 12% hydroelectric, and 8% flexible natural gas power plants, as well as 23% of battery storage capacity. The remaining 2% is split between biomass, geothermal, and other less common energy sources.

What are Chile's green hydrogen goals?

Chile has several long- and short-term Green Hydrogen goals. A long-term goal is to become a top world exporter of hydrogen by the year 2050. In the short term the country aims to have ten to twelve green hydrogen projects in development by the end of 2026.
