

Selling solar energy materials for power generation

How can a home owner make money from selling solar energy?

Earn money: Homeowners can earn money by selling back electricity to the grid in the UK through programs like the Smart Export Guarantee (SEG). Reduced carbon emissions: Selling excess solar energy back to the grid can help reduce the need for fossil fuels and decrease carbon emissions.

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

How do I sell excess electricity generated by my solar PV system?

To sell excess electricity generated by your solar PV system, you need to apply directly to a licensed SEG tariff supplier. Your SEG licensee doesn't have to be your current top-up electricity supplier. You can choose different companies for SEG payments, electricity supply, and gas supply.

How much money can you make selling solar power back to the grid?

Consulting with a professional solar installer is recommended for a seamless setup. Homeowners in the UK can potentially earn between £80 - £165 annually by selling solar power back to the grid. The exact amount varies based on the system's size and the tariffs offered by energy suppliers.

Can you get money from solar panels?

As a homeowner with solar panels, you may be able to receive payments for any excess solar energy you send back into the grid. Since 2019, the government has backed various schemes to help those who produce renewable energy, to benefit from sending their surplus into the national energy supply.

How can I earn from selling electricity back to the grid?

The best way to earn through selling electricity back to the grid in the UK is by using the Smart Export Guarantee scheme. Since January 2020, the Smart Export Guarantee scheme has offered small-scale low-carbon energy generators an opportunity to sell solar energy to the grid in the UK.
