

What is a Teknoware central battery system?

Teknoware's range of central battery systems starts with small systems containing just a few dozen luminaires and a single central battery unit up to centrally controlled systems containing thousands of luminaires.

What solutions does Teknoware offer?

Both centrally supplied and self-contained solutions are available. We also supply a unique fibre optic Low Location Lighting system based on our own Optiline(TM) fibre. Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system.

What products does Teknoware manufacture?

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware's entire product range is designed to meet the requirements of the relevant European directives and standards. This is proved with certificates from accredited laboratories.

Do Teknoware luminaires need separate data cabling?

The testing of the luminaires is based on individual addresses, and the communication is by means of the power supply cables. Thus, there is no need for any separate data cabling between the luminaires. The luminaires must be addressable, of the Teknoware products with the letter K in the end, or they must have a separate address module.

What is a tkt67 central battery system?

Central Battery Systems in the TKT67 series offer effective solutions for supplying a large quantity of luminaires. They are especially suited for large premises. The central unit input voltage is 220-240 VAC. The output voltage is 220-240 VAC in normal mode and 216 VDC in battery mode.

Where are the central battery systems made?

All our central battery systems and their components, as well as all the accessories and spare parts related to these systems, are designed and manufactured in our own factory in Finland. The central battery systems are always made to order, according to the needs of the customer.

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for ...

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware's entire product range is designed to meet the requirements of the relevant European directives and standards. This is proved with certificates from accredited ...

The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. Depending on the model, the 75C central battery unit has 4-24 output circuits. Max. battery capacity 65 Ah.
