

Singapore lumentech energy solutions

Is solar energy a good option for green energy in Singapore?

Situated near the equator, Singapore enjoys sunlight all year round. This makes solar energy a promising option for green energy. Furthermore, less land is needed to harness solar energy vis-à-vis other forms of green energy.

Can Singapore develop solar energy as a viable source of electricity?

Uniquely, it was commissioned in six months, the fastest in the world of its size to be deployed. Overall, Singapore is pursuing this two-pronged strategy to develop solar energy as a viable source of electricity. In 2022, the Ministry of Trade and Industry (MTI) published a report on Singapore's National Hydrogen Strategy.

How can Singapore achieve a higher rate of PV panel installation?

Firstly, Singapore seeks to attain a higher rate of PV panel installation. This requires creativity in tackling competing demands for land usage. On this front, Singapore has risen to the occasion by deploying PV panels in reservoirs, on rooftops, and at temporarily vacant plots of land.

SINGAPORE/SEOUL, October 9, 2024 - Hyundai Motor Group (the Group) has signed a collaborative research agreement with Nanyang Technological University, Singapore (NTU) in the field of new energy. The partnership will encompass a three-year research collaboration, focusing on the areas of hydrogen energy business and advanced energy system.

The SEC is a consortium founded by the Nanyang Technological University (NTU) and the National University of Singapore (NUS). The centre aims to create a framework for a long-term partnership between the universities and the industry on both technological and socioeconomic issues in sustainable energy development.

Singapore's journey towards a more sustainable energy future is clearly and ambitiously outlined in the Singapore Green Plan 2030. While the goals might seem lofty, they are necessary stepping stones to combat the ...

Bluenergy hydrokinetic energy solutions can be applied to both the off-grid and grid markets onshore and offshore locations and address the needs of the emerging Blue Economy.
