

Siro energy Singapore

Who is Siro energy?

Siro Energy is a Renewable Energy Semiconductor Manufacturing company located in TR with 752 employees. Find top employees, contact details and business statistics at RocketReach.

What is the main source of energy in Singapore?

The main source of energy in Singapore is fossil fuels. Currently, oil and natural gas account for over 95% of total energy generation. Over the last decade, natural gas has gained a larger energy share due to the country's first shift in energy production.

How will Singapore's energy mix change?

Singapore's energy mix heavily favours fossil fuels, but the country is aiming to change this. As a result, several of the leading energy companies in the country are developing renewable energy projects. This will likely be spurred on by government subsidies and favourable policies in the coming decade.
