

Are smart grids and IoT a good investment?

Despite these considerable implementation costs, smart grids and IoT save considerable energy by instant and intelligent power rerouting. Regardless, the cost factor that plays a vital role in implementing IoT is smart grids. While IoT creates more business opportunities, it also poses various technical challenges in integrating with smart grids.

What are the applications of IoT in smart grids?

Table 2 describes the applications of IoT in various sectors in the smart grid (see Reka and Dragicevic 2018 ). In summary, the applications of IoT in smart grids can be categorized into three main layers of generation level, transmission level, and distribution level.

What are the challenges of IoT adoption in smart grids?

However, there are specific challenges like security and privacy (Dalipi and Yayilgan 2016 ), cost and communication stability (Mugunthan and Vijayakumar 2019 ), and lack of proper standards for data and services (Bagherzadeh et al. 2020) in the IoT adoption in smart grids, which need careful consideration.

Are smart grids a good idea?

Efficient power quality lowers commercial productivity loss and the damage to electric appliances due to sudden voltage fluctuations. Even though smart grids have provided certain benefits to power distribution networks, they still face multiple problems and inadequacies.

Intelligente Netze - Smart Grids - bestehen aus einer Reihe von Massnahmen, welche die fluktuierende Elektrizit&#228;tserzeugung aus dezentralisierten erneuerbaren Energien sowie den Stromverbrauch sicher, effizient und zuverl&#228;ssig auszubalancieren sollen, um den Netzausbaubedarf im Zusammenhang mit der Energiestrategie 2050 zu verringern.

A smart IoT-based grid is subject to various security challenges such as impersonation, eavesdropping, data tampering, availability and denial of service issues, etc. []. Since IoT devices are vulnerable to cyber-attacks the main problem that needs to be addressed is: "what if the IoT devices" data in the smart grid is hacked/ manipulated?"
