

Where does Colombia's energy come from?

The majority share of renewable energy is expected to come through solar energy resources due to the high solar energy potential of the country, as it is located near the equator. Recently, hydropower has been the dominant source in Colombia's energy generation mix, accounting for over 70% of the total share.

Why is Colombia a good source of solar energy?

Colombia's potential for renewable energy sources Colombia enjoys solar radiation throughout the year, especially in departments such as La Guajira, Atlantico, Antioquia and Valle de Cauca. The country's geographic positioning is one of the reasons why it has become an important solar energy generator.

Where is geothermal energy available in Colombia?

Geothermal: The Colombian Geological Service estimated an electric power of 1,170 MW, and there is special interest in areas such as Paipa (Boyacá), Azufral (Nariño), San Diego (Cesar), Nevado del Ruiz (Tolima-Caldas), Santa Rosa (Risaralda), and Cerro Machín (Tolima). 50% income tax deduction for 15 years for investments in alternative sources.
