The Lake Destiny 5MW Solar Farm is the first utility-scale, commercial solar project in the Cayman Islands. It was completed and commissioned in June 2017 and is located on a 20-acre site in Bodden Town, Grand Cayman. The Farm comprises 21,690 poly-crystalline photovoltaic (solar) modules each with a DC-rated capacity of 305 watts.

Also referred to as feed-in-tariff programs, this process involves installing solar panels on your property and selling that power back to the grid. The power generated by the solar panels connects directly into the electric utility feed. In Cayman Islands, this process is called the CORE program. Inverters:

Ideally tilt fixed solar panels 17°; South in George Town, Cayman Islands. To maximize your solar PV system's energy output in George Town, Cayman Islands (Lat/Long 19.2886, -81.3722) throughout the year, you should tilt your panels at an angle ...

The Ministry of Sustainability and Climate Resiliency is moving forward with plans to conduct energy-efficiency retrofits and rooftop solar on 10 pre-selected National Housing Development Trust homes.

A 100 MW solar farm would require approximately 587 acres (about 0.92 square miles) of land. To achieve equivalent daily production as a traditional power plant, a scaled-up 480 MW solar farm would need about 2,822 acres (about 4.41 square miles). This substantial land requirement is a significant consideration for our island's limited space.
