

Solar panel company rents land

How much does a solar farm land lease cost?

With solar farm land lease rents ranging from £850-£1100 (depending on variables such as development size and location) per acre per annum, rental rates compare favourably with other income streams such as agricultural and livestock farming, event hosting and storage services.

Can I rent land for a solar farm?

Renting land for a solar farm is a commercial lease and is not an agricultural use, so Agricultural Property Relief from inheritance tax may be lost. Transferring ownership of the land to another individual or trading entity before any development starts may be worth considering, to minimise the tax implications, but seek professional advice.

Do landowners get paid for a solar project?

The landowner typically receives annual lease payments or in some cases, may even sell a portion of their land for the solar project. The lease payments become a source of passive income for the landowner and help increase the use of clean energy.

How does solar land lease work?

Land rental is paid per acre and compares favourably with other uses (including agricultural leasing). Solar land lease revenue streams provide financial certainty and can play a vital role in ensuring families maintain ownership of their farms and estates into the future.

Should you lease land for solar?

One of the biggest pros of leasing land for solar is the financial stability offered through these long-term annual payments. This can be especially beneficial for landowners looking for a way to supplement their farm or retirement income.

What is a solar farm land lease program?

Solar Farm Land Lease Programs offer an opportunity for farmers, estate owners and other landowners to diversify their income streams and realise the potential of land that may otherwise be left overgrown or redundant.
