

# Solar panel in gujranwala Sri Lanka

Who makes the best solar panels in Sri Lanka?

Hayleys Solar partners with leading tier-1 solar panel manufacturers around the world to provide the best solar panels in Sri Lanka. All our solar system projects are fitted with durable and conversion-efficient solar panels to ensure that our customers receive long-lasting solar systems.

How does a solar system work in Sri Lanka?

**Solar Panels:** These are the most visible components of a solar system. Solar panels convert sunlight into direct current (DC) electricity. The efficiency of these panels can vary, but in Sri Lanka, with its average solar irradiation of around 4.5 to 5.5 sun hours per day, solar panels can generate significant amounts of electricity.

Are solar panels a good investment in Sri Lanka?

Solar panels are a long-term investment that can provide you with savings for years to come. The solar energy industry is growing rapidly in Sri Lanka and can create new job opportunities in areas such as installation, maintenance, and research and development.

Why should you choose a residential solar system in Sri Lanka?

Adopting a residential solar system in Sri Lanka can lead to substantial savings on electricity bills, enhance energy security, and contribute to environmental sustainability. Whether opting for an on-grid, off-grid, or hybrid system, working with certified professionals is crucial to ensure a properly designed and installed system.

How much does a solar system cost in Sri Lanka?

Residential solar installations in Sri Lanka typically start at around 500,000 LKR to 750,000 LKR for basic setups. With a budget of 500,000 LKR, you can generally expect a solar system producing approximately 2 kW to 3 kW of power. If you have a budget of 750,000 LKR, the system size might range from about 3 kW to 5 kW.

How do solar panels work?

Sunlight falls on solar panels during daylight hours. The solar panels convert the sun's energy into direct current (DC) electricity which is sent to an inverter. Inverter converts direct current (DC) into alternating current (AC). One phase of this alternating current flows to the meter and through the meter, it goes to the national grid.
