

Solar web Oman

What is Oman Solar?

Oman Solar is a company that uses the latest technology to convert natural resources into electrical power through solar photovoltaic energy. This solution is reliable and suitable for remote applications in the region due to the nearly year-round availability of sunlight. At Oman Solar, we harness the power of the sun.

What is the Sultanate of Oman doing with solar energy?

As of currently, the Sultanate of Oman is implementing solar energy applications for street lighting, traffic lights, and telephones in remote areas.

Is solar energy a viable option in Oman?

Solar energy is a viable option in Oman given the vast unused land and available solar energy resources. It could not only cater to the growing need for energy diversification but also help in economic diversification in Oman.

How much solar will Oman need by 2030?

SolarPower Europe says in a new report on solar development in Oman that the nation will need to install a minimum of 13 GW of solar by 2030 to meet its ambitious net-zero targets.

When will Oman launch a solar project?

In January 2024, Oman launched a public tender for another 500 MW solar project, Ibri Solar III, with commercial operations due to begin in the fourth quarter of 2026. Public tenders are expected for three new solar projects and five wind projects between 2025 and 2029.

Petroleum Development Oman (PDO) is the largest oil and gas producer in Oman. It is a joint venture between the government of Oman, Shell, Total and Partex. Miraah is one of the world's largest solar plants. The solar thermal facility is harnessing the sun's energy to produce steam that is used in oil production.
