

Somalia interpower ltd

Who generates electricity in Somalia?

Small and medium-sized private sector companies are the main providers of electricity generation and distribution, primarily running diesel powered systems through off-grid networks. Private Somali companies generate approximately 128MW; most companies generate and distribute electricity independently.

Does Somalia have a power grid?

There is no national power grid. Diesel generators are the primary source of electricity. Most generators and distribution equipment are old and inefficient, resulting in a low-quality electricity supply. Regarding costs per kilowatt-hour of electricity, Somalia has one of the highest unit prices in Africa.

How many people in Somalia have access to electricity?

While variations exist between rural and urban areas, in 2023 the Somali Household Budget survey estimated more than half of the population (61.9 percent) had access to electricity, demonstrating progress on the expansion of electricity services in the country.

Does Somalia have wind power?

Wind Energy: Studies suggest Somalia has high potential for onshore wind power and could generate between 30,000 to 45,000 MW. A pre-conflict 1991 article in the scientific journal Solar Energy assessed that "the wind resource appears suitable for power production in 85 percent of the country."

Does Somalia have solar energy?

Solar Energy: Somalia has high renewable energy potential. Solar power could generate an excess of 2,000 kWh if the country reached its full capacity. Recently there has been progress in developing solar energy systems in the country by private sector electricity companies.

What percentage of Somali households use charcoal?

Urban areas stand out for using charcoal (60.6 percent) while other residence types rely more often on firewood (55.8 percent for rural households and 94.3 percent for nomadic households) according to the Somali Government Integrated Household Budget Survey.
