

St Kitts and Nevis 25 kva solar system price

Does St. Kitts already have a solar PV system?

St. Kitts will receive 30 - 35% of its annual electricity demand from a solar PV system as part of a new project. The solar and storage system will supply sustainable solar energy with zero emissions and replace over 4,000,000 gallons of diesel per year. The energy will be provided under a fixed-price PPA for a period of 25 years.

Does St Kitts and Nevis have a national energy policy?

Yes, St. Kitts and Nevis has a National Energy Policy (NEP). The key provisions of this policy include connecting large-scale independent power providers and many distributed renewable energy systems to the electrical grid. Not all generation is made publically available; this chart provides known and referenceable data.

How much solar energy does St Kitts use?

In St. Kitts and Nevis, the solar resource averages 5 kWh per square meter. Solar energy is already being used for grid-powered induction lighting and street lights along roadways. A 7 MW waste-to-energy power plant is planned to come online on St. Kitts in 2015.

When will skelec start supplying Solar energy to St Kitts?

The project is scheduled to start construction in the second quarter of 2024 and start providing the solar energy to SKELEC in 2025. With the execution of the amended 25-year PPA and other related documents, the project is putting St. Kitts at the leading edge of renewable energy integration worldwide.

How much does electricity cost in St Kitts & Nevis?

The electricity rates in the Federation of St. Christopher (St. Kitts) and Nevis are \$0.26 per kilowatt-hour (kWh). This is lower than the Caribbean regional average of \$0.33/kWh.

How much energy is lost in St Kitts & Nevis?

Reports indicate that in St. Kitts and Nevis, higher losses are largely attributable to nontechnical losses such as unmetered consumption, leading to losses that are higher than the U.S. Energy Information Administration's average transmission and distribution loss of 6%. By comparison, the U.S. Energy Information Administration reports an average transmission and distribution loss of 6%.
