Saint Kitts and Nevis: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Nevis, one of the twin islands forming the nation of St. Kitts and Nevis, is not just a beautiful Caribbean destination but also a pioneer in sustainable tourism. This small island has embarked on an impressive journey to transform its energy sector from fossil fuels to renewable sources, setting an example for other regions.
