

Starting a solar energy company Slovakia

Does Slovakia have a rooftop solar energy potential?

According to the report *Rooftop Photovoltaic Energy Potential in Slovakia (2023)*, drafted for SAPI by Energiewerkstatt, Slovakia has a theoretical (realisable) rooftop PV potential of around 37 GW.

Will NECP be able to harvest Slovakia's solar potential?

The current Slovakia's NECP projects a solar PV target of 1,200 MW cumulatively installed in 2030. While the NECP does not specify the character of these capacities, it is to be assumed that both ground-mounted and rooftop PV will play a role in harvesting Slovakia's solar potential.

Is geothermal energy used in electricity production in Slovakia?

At the end of 2022, geothermal energy is not used in electricity production, but only to a limited degree for heat production and recreational use. This makes it the only RES-E technology in Slovakia without any installed capacity. Slovakia's overall (probable) geothermal potential is calculated at around 6,200 MWt.
