

Who is sunovation?

Well-known, internationally operating architectural offices and construction companies rely on SUNOVATION's expertise in building integrated photovoltaics (BIPV). The world's largest BIPV projects in recent years have been realised by SUNOVATION.

How does sunovation work?

This is based on pigments that ensure rich colour coverage with simultaneous transparency. Sunovation uses the interference of light for this purpose. The technology is based on the fact that the sunlight hitting the module surface is split up like in a prism. The part of the light that is necessary for colouring is selectively reflected.

How can sunovation improve the performance of coloured solar modules?

The size, shape and cell configuration can still be customised. With a new type of colour coating, Sunovation can improve the aesthetics of coloured solar modules on the one hand. On the other hand, the company reduces the reduction in performance due to the colouring.

What is sunovation eForm?

High-quality, uniformly colored photovoltaic glasses without visible PV technology Convincing features. Glass-glass modules SUNOVATION eFORM are dimensioned and manufactured on a project-specific basis. Give free rein to your creativity; play around with geometries and dimensions.

What does a solar project mean for Serbia?

For Serbia, this project means more than just meeting renewable energy goals. It promises energy independence, economic stability, and a sustainable energy supply. By creating a network of self-balancing solar plants, Serbia strengthens its energy security, attracts green investments, and aligns with global environmental standards.

Why is solar energy important in Serbia?

Solar energy offers a practical, scalable solution for diversifying energy sources. This shift to solar not only benefits the environment but also strengthens the economy by fostering a local green energy supply. Serbian industries can rely on this domestic energy source, cutting down on costs tied to fossil fuel imports.

Elsfeld, Februar 2022 - SUNOVATION sponsert Glas-Glas-Module eFORM clear und eFORM unichrome für das Wettbewerbsgebäude des Rosenheimer Teams LevelUp. Die Solarglasmodule der Serie eFORM clear kommen als gebäudeintegriertes, transparentes Photovoltaik-Dach zum Einsatz. ... Solar Decathlon Europe (SDE 21/22)

Germany : Business Details Crystalline Crystalline, BIPV ... ENF Solar is a definitive directory of solar companies and products. Information is checked, categorised and connected. ENF Recycling

Elsfeld, März 2022 - Im Juni 2022 findet das Finale des Solar Decathlon Europe 21/22 (SDE 21/22) in Wuppertal statt. 18 Teams aus elf Ländern stellen sich der Herausforderung das Wohnen und Leben von morgen zu verbessern. Im renommierten Hochschulwettbewerb geht es um Sanierungs- und Nachverdichtungsentwürfe ...

SERBIA INNOVATES PROGRESS REPORT 7 4. Clean and green tech for sustainable development Targets: Waste management, biomass energy, solar energy, wind energy, green construction materials, environmental-friendly solutions, biodegradable materials and products (such as plant walls, plant-based packaging), R& D, etc. 5. Industry 4.0

SUNOVATION eFORM color kombiniert schwarze Solarzellen mit gebogenen Spezialgläsern. Durch den Einsatz bedruckter Rückgläser, teilbedruckter Frontgläser und schwarzer Zellverbinder wird die Farbe der Glas-Glas-Module an die der kristallinen Solarzellen angepasst. Ergebnis ist ein modernes Glas-Glas-Modul, das durch seine edle Anmutung und ...

Wesentliche Produktgruppen sind die Solar-Glaselemente „eFORM color“ und „eFORM unichrome“, die sich neben ihrer herausragenden Ästhetik insbesondere auch durch einen überdurchschnittlichen Solarertrag auszeichnen. SUNOVATION beliefert weltweit Kunden, die besondere architektonische Lösungen suchen.

Elsfeld, September 2023 - In Regensburg entsteht aktuell eine gebäudeintegrierte Photovoltaik-Fassade (BIPV) in der Farbe „Champagner“. Der Farbton der Glas-Glas-Module eFORM unichrome (Kollektion ColorQuant) harmoniert wunderbar mit den Fassaden-Elementen aus Metall, die im Materialmix mit den BIPV-Modulen in der Fassade angebracht werden. ...

One of the key initiatives driving Serbia's solar energy growth is the Better Energy program by the United States Agency for International Development (USAID). This \$10 million project aims to enhance energy efficiency and promote the use of renewable energy sources at the municipal level in Serbia. The recent installation of a 50 kW solar ...

Aktuelle Stellenangebote von SUNOVATION finden Sie hier Jetzt passende Stelle finden. Wir freuen uns auf Ihre Bewerbung! Wir sind ein mittelständisches Unternehmen mit Firmensitz in Obernburg. Wegen des guten Arbeitsklimas, einer überdurchschnittlichen Entlohnung und beruflicher Förderung arbeiten unsere Mitarbeiter gerne bei uns ...

See also: Sunovation supplies stunning solar roof for Moscow. To this end, Sunovation is further expanding its organisation - particularly in the areas of sales and product development. By moving into new office space, Sunovation is laying a further foundation for future growth. Details of the new Sunovation site

SUNOVATION eFORM combines colored solar cells with colored special glasses. By using printed rear glasses and partially printed front glasses, the color of the glass-glass modules is adapted to the crystalline solar cells. The result is a glass-glass module that captivates by its coloring and surface effect. The specific structure of the solar ...

Hier finden Sie das Impressum von SUNOVATION Hersteller individueller Glas-Glas-Module für gebäudeintegrierte Photovoltaik! SUNOVATION GmbH Walter-Reis-Str. 1 D-63785 Obernburg Germany. Geschäftsfoührer: Heribert Ley. Tel.: +49(0) 6022 / 26573-0 E-Mail: info@sunovation .

Manufacturer of solar glass modules for architecture - Sunovation produces unique architectural solutions for glass modules und facade elements. ... are also characterised particularly by an above-average solar yield. Since 2014, SUNOVATION has been supplying customers worldwide who are looking for special architectural solutions from its new ...

Transparent glass-glass modules SUNOVATION eFORM clear are especially used for large-scale glazing with integrated photovoltaic in overhead applications and as solar facades. However, they can be configured for fall protections, conservatories, canopies, artworks and much more. Individual for each project!

The use of curved solar modules is interesting for modern building designs with organic shapes, where building materials are intended to seamlessly integrate into the building shell. ... SUNOVATION only uses coatings that do not show any undesired optical influences and that do not affect the aesthetic of the building integrated photovoltaic ...

SUNOVATION | 2.130 Follower:innen auf LinkedIn. The BIPV company. | Manufacturer of solar glass modules for architecture SUNOVATION is the leading manufacturer of solar glass modules for application in architecture. Since 2001 SUNOVATION has been developing and manufacturing facades and roof elements based on the unique silicon filling process (SCET). Well-known, ...

Welcome to the heart of innovation in renewable energy--the first solar panel factory in Serbia. With a mission to enhance energy independence and environmental preservation, we at DoMi Eko Solar are committed to producing high-quality solar panels using the latest technologies in ...

Sunovation - Building Integrated Photovoltaics - individually produced BIPV modules for pv-facades and roofs. Glass-glass-modules available in a huge variety of colors and different levels of transparency.

Wenn Sie sich für farbige Solarmodule der Serie SUNOVATION eFORM unichrome oder generell für die Einsatzmöglichkeiten unserer Solarglas-Module und Architekturgläser interessieren, nehmen Sie gerne Kontakt mit uns auf. Sie erreichen uns telefonisch unter +49(0) 6022 / 26573-0 oder per E-Mail an info@sunovation .

Sunovation solar Serbia

Germany supplier of photovoltaic, solar, renewable. SUNOVATION is devoted to developing solutions for problems that arise when using regenerative energies. Its aim is to determine new fields of application that are ecologically sensible.

Glass-glass modules from SUNOVATION are individually manufactured and made-to-measure. Existing grids, such as the floor height, are often used for optimal integration. The sizes are freely selectable and usually range between 0.8 to 1.5 m in width and 2.0 to 3.5 m in height. ... The focus of these special solar modules for solar facades and ...

SUNOVATION eFORM unichrome is perfecting color solar modules for building integration. The employed photovoltaic-technology optically vanishes due to full-surface printing with UV-resistant and translucent special inks. The result is a glass-glass module that does not show its power-generating feature. Particularly interesting when photovoltaic ...

Elsfeld, Juni 2022 - Medizinisches Versorgungszentrum Marburg mit nahtloser, gebäudeintegrierter Photovoltaik-Fassade. Die verglaste Fassadenrundung des Gebäudes ist mit aktiven Photovoltaik-Modulen ausgestattet. Modulhersteller SUNOVATION hat die gewählten Glas-Glas-Module mit jeweils 2 bis 3 m² in Fläche ...

Obernburg, Dezember 2023 - SUNOVATION bezieht zum Jahresende seinen neuen Firmensitz in Obernburg. Der Standort am bayerischen Untermain, in der Nähe von Frankfurt, punktet durch eine zentrale Lage für Kunden, Geschäftspartner & Mitarbeiter sowie eine direkte Verkehrsanbindung an die Hauptverkehrsadern im ...

SUNOVATION eFORM combines colored solar cells with colored special glasses. By using printed rear glasses and partially printed front glasses, the color of the glass-glass modules is adapted to the crystalline solar cells. The result is a ...

Each solar station can charge the batteries of two cars at the same time. The Serbian government pays great attention to the development of innovative infrastructure and high-performance communication routes. ... Finally, Vucic asked the Hungarian prime minister to consider Serbia's purchase of "a 5-10% stake in the Paks NPP built in ...

Elsfeld, März 2022 - SUNOVATION unterstützt das Aachener Team LOCAL+ mit Glas-Glas-Modulen eFORM unichrome für die gebäudeintegrierte Solarfassade ihres Wettbewerbsgebäudes. Im Juni 2022 findet das Finale des Solar Decathlon Europe 21/22 (SDE 21/22) in Wuppertal statt, bei dem 18 Teams aus elf Ländern mit Ihnen ...
