

Where are sunware solar systems made?

SunWare GmbH &Co KG develops and produces all modules and controllers in Duisburg,Germany. Sunware is a manufacturer of off-grid solar systems,marine solar modules and solar systems. For boat,offshore &all-wheel drive |Solar systems made in Germany

Who is sunware solartechnik?

The SunWare Solartechnik GmbH &Co. KG,based in Duisburg founded in 1987 by Dipl.-Ing. Julian Schüren. Initially specialized in the production of solar modules,solar charge controllers for marine and caravan applications. In 1995,the product range of SunWare was extended by the service sector.

Who is sunware?

This long-standing expertise in maritime solar technology, with its own development and production department with a team of young, motivated staff, SunWare has become the market leader in a market segment for demanding solar product solutions. The SunWare Solartechnik GmbH & Co. KG, based in Duisburg founded in 1987 by Dipl.-Ing. Julian Schüren.

What does sunware do?

SunWare begins developing and manufacturing machines for the production of solar modules. SunWare introduces a cell connector developed in-house for the solar modules, which is significantly more resistant to thermal stress compared to the usual cell connectors.

What are sunware solar modules?

The SunWare solar modules are specially designed and developed for use in the maritime sector. The modules are available in 12 volt and 24 volt versions. All used components of the entire module are absolutely see-and saltwater-resistant. The production facilities for our own production are optimized for maximum quality and flexibility.

What are sunware solar panels used for?

SunWare solar panels are designed for extraordinary wind and temperature loads. Usage, among other things, in safety-relevant technology such as avalanches and glacier monitoring devices. Solar systems for public spaces.

About SunWare. The SunWare Solar GmbH & Co. KG has been producing and developing more than 20 years maritime solar systems. This long-standing expertise in maritime solar technology, with its own development and production department with a team of young, motivated staff, SunWare has become the market leader in a market segment for demanding solar product ...

The Plug & Play solar panels from SunWare. Install the solar module, insert the charger - ready! The plug-in solution. 5m supply cable with SureSeal plug on the solar panel, suitable for the accompanying FOX-062

charge controller. Simply plug the FOX-062 into the socket of the vehicle and the battery is already charged from the solar panel ...

The SunWare Textile panels are mounted in highly durable solar fabric and are easily fixed to a spray-hood they can be easily folded away when not in use. ... SunWare's textile solar panels are quickly attached to a canopy to generate free electricity from the sun for battery charging. This is especially convenient when sailing as they can be ...

The Sunware Series 20 solar modules are specifically designed to be lighter, more compact and more powerful that the previous generation Sunware solar panels. The Series 20 solar panels include high performance solar cells with an EVA laminate and ETFE coating for improved durability, even in harsh applications like sea buoys or other salt water marine environments. ...

SunWare solar panels are designed and manufactured for extreme application conditions. From use on sea sea buoys and boats to avalanche bridges, SunWare marine solar panels and solar systems are used worldwide wherever reliability, durability, robustness and freedom from maintenance are required. Made in Germany by SunWare.
